

Lista raportów IEA CCC - stan maj 2009 r.

Tytuł	numer
Impact of emissions legislation on coal-fired power plants	CCC/145
Post-combustion carbon capture - solid sorbents and membranes	CCC/144
Future developments in IGCC	CCC/143
Economic instruments and clean coal technologies	CCC/142
Meeting the demand for new coal-fired power plants	CCC/141
Coal gasification	CCC/140
Polygeneration from coal	CCC/139
Prospects for coal and clean coal technologies in Russia	CCC/138
Competitiveness of coal-fired power generation	CCC/137
Performance and risks of advanced pulverised coal plant	CCC/135
Economics of mercury control	CCC/134
Greenhouse gas emission factors for coal	CCC/136
Coal to liquids	CCC/132
The Korean Energy Strategy Project	CCC/133
Energy security and the role of coal	CCC/131
Research & development needs for clean coal deployment	CCC/130
Prospects for coal and clean coal technologies in India	CCC/129
Properties and behaviour of SO ₂ adsorbents for CFBC	CCC/128
Coal supply challenges for China	CCC/127
Supply costs for internationally traded coal	CCC/124
Cofiring of coal and waste fuels	CCC/126
Post combustion carbon capture from coal fired plants - solvent scrubbing	CCC/125
Prospects for coal and clean coal technologies in the Czech Republic	CCC/120
Clean coal technologies for a carbon-constrained world	CCC/123
Trace elements and fly ash utilisation	CCC/122
European legislation (revised LCPD and EU ETS) and coal	CCC/121
Prospects for coal and clean coal technologies in Poland	CCC/119
Ash management in coal-fired power plants	CCC/118
Public attitudes to new coal-fired plant	CCC/117
Trends in SO ₂ emissions	CCC/115
Use of PCI in blast furnaces	CCC/116
Management of FGD residues	CCC/114

Power projects using methane from coal mines	CCC/112
Coal gasification and IGCC in Europe	CCC/113
Economics of retrofit air pollution control technologies	CCC/111
Developments in fluidised bed combustion technology	CCC/110
International funding sources for major coal investment projects	CCC/109
Implications of forestry carbon offsets for the coal industry	CCC/108
RD&D on coal use in Australia and the COAL21 action plan	CCC/107
Life extension of coal-fired power plants	CCC/106
Chlorine in coal combustion and cofiring	CCC/105
Coalbed methane emissions - capture and utilisation	CCC/104
Use of coal in areas of water shortage	CCC/103
Fuels for biomass cofiring	CCC/102
Towards zero emission coal-fired power plant	CCC/101
Online analysis and coal-fired power plant	CCC/100
Premium carbon products and organic chemicals from coal	CCC/98
Coal full life cycles analysis	CCC/99
Implementing clean coal projects under Kyoto	CCC/97
Land uses of coal fly ash - benefits and barriers	CCC/96
Fundamentals of pulverised coal combustion	CCC/95
Summary of Canadian Clean Power Coalition work on CO2 capture and storage	CCPC/1
The Kyoto Protocol in 2002 - opportunities for coal	CCC/66
The impact of emissions trading on the coal industry	CCC/86
Cement and concrete - benefits and barriers in coal ash utilisation	CCC/94
Utilisation of CFBC and IGCC residues	CCC/93
Air pollution control technologies and their interactions	CCC/92
Understanding coal-fired power plant cycles	CCC/91
Current design and construction of coal-fired power plant	CCC/90
The importance of PM10/2.5 emissions	CCC/89
Use of coal in direct ironmaking processes	CCC/88
Coal in China	CCC/87
Competitive position of coal for power generation	CCC/84
Coal in an enlarged European Union	CCC/85
Studying the structural chemistry of coal	CCC/82
The potential for coal use in Pakistan	CCC/83
Prospects for hydrogen from coal	CCC/78

Clean fuels from coal	CCC/81
Sustainable development in the production and use of coal	CCC/79
Trends in emission standards	CCC/77
Upgrading instrumentation and control in coal-fired power plant	CCC/80
Understanding fluidised bed combustion	CCC/76
Clean coal technologies	CCC/74
Clean coal technologies roadmaps	CCC/75
Developments in particulate control	CCC/73
SO ₃ issues for coal-fired plant	CCC/72
Co-utilisation of coal and other fuels in cement kilns	CCC/71
Prospects for integrated air pollution control in pulverised coal fired power plants	CCC/68
Improving efficiencies of coal-fired power plant in developing countries	CCC/70
Coal quality assessment and the validity of empirical tests	CCC/63
Matching gasifiers to coals	CCC/65
NO _x controls for pulverised coal-fired power stations	CCC/69
Coal upgrading to reduce CO ₂ emissions	CCC/67
Trends in the use of coal ash	CCC/22
Coal-fired power station effluents	CCC/10
Developments in FGD	CCC/29
Computers and air pollution control	CCC/17
Hot gas cleanup of sulphur, nitrogen, minor and trace elements	CCC/12
Air pollution control and coal-fired power generation in the Indian subcontinent	CCC/11
East Asia - air pollution control and coal-fired power generation	CCC/06
Coke production and the impact of environmental legislation	CCC/35
Trace element emissions	CCC/34
Sampling and analysis of PM ₁₀ /PM _{2.5}	CCC/09
PM ₁₀ /PM _{2.5} - emissions and effects	CCC/08
Trends in NO _x emissions from coal utilisation	CCC/02
CO ₂ reduction - prospects for coal	CCC/26
Clean coal technology transfer - CO ₂ reduction in power generation	CCC/19
Experience of indirect cofiring of biomass and coal	CCC/64
NO _x modelling and prediction	CCC/31
Ash behaviour during combustion and gasification	CCC/24
Experience of cofiring waste with coal	CCC/15

NOx in pulverised coal combustion	CCC/05
Materials development for coal, biomass and waste fuel plants	CCC/61
Non-baseload operation of coal-fired power plants	CCC/33
Materials for FGD systems	CCC/27
Non-OECD coal-fired power generation - trends in the 1990s	CCC/18
Competitiveness of future coal-fired units in different countries	CCC/14
Switching to cheaper coals for power generation	CCC/01
Modes of occurrence of trace elements in coal - results from an international collaborative programme	CCC/36
How coal properties influence emissions	CCC/28
Management of coal stockpiles	CCC/23
Major coalfields of the world (2nd edition)	CCC/32
Coal research, development and demonstration funding	CCC/25
Liberalisation of electricity markets and coal use	CCC/21
Uncontrolled fires in coal and coal wastes	CCC/16
Coal as an energy source	CCC/20
Competitiveness of coal - the evolution of price	CS/05
Coal-fired independent power production in developing countries	CCC/03
Adding value to coal cleaning wastes	CCC/04
Coal licensing and production tax regimes	CCC/07
Rescue and emergency support services in underground coal mines	CCC/13
Opportunities for coal preparation to lower emissions	CCC/30
Non-CO2 greenhouse gases - emissions and control from coal	CCC/62
Prospects for co-utilisation of coal with other fuels - GHG emissions reduction	CCC/60
Greenhouse gas emissions reduction by technology transfer to developing countries	CCC/59
Market mechanisms for greenhouse gas emissions reduction	CCC/50
Potential for economic greenhouse gas reduction in coal-fired power generation	CCC/49
Air pollution control costs for coal-fired power stations	CCC/53
Prevention of particulate emissions	CCC/40
Industrial coal use - prospects for emissions control	CCC/38
Mercury - emissions and control	CCC/58
Organic compounds from coal utilisation	CCC/51
Instrumentation and control in coal-fired power plant	CCC/56
The use of petroleum coke in coal-fired plant	CCC/55

Operation of coal-fired plant - reducing costs	CCC/54
Improving the competitiveness of next generation coal-fired plants	CCC/52
Fuel cells - use with coal and other solid fuels	CCC/47
Ageing of coal-fired power plants	CCC/45
Hybrid plants for coal and natural gas firing	CCC/43
Prospects for upgrading coal-fired power plants	CCC/41
Advanced clean coal technologies and low value coals	CCC/39
Ceramics for advanced power generation	CCC/37
Metallurgical coke production	CCC/57
Modelling and simulation for coal gasification	CCC/42
Rapid analysis of trace elements in coal utilisation	CCC/46
Experience from coal industry restructuring	CCC/48
Comparative environmental standards - deep mine and opencast	CCC/44
